

SHIPSAFE AI

CLIENT READINESS AUDIT

Professional report template for reviewing an AI-built application.

CONTROL THE AGENT. PROTECT THE PROJECT. SHIP WITH EVIDENCE.

Version 1.0 | June 2026

Executive summary

Metric	Result
Overall readiness score	
Decision	
Critical findings	
Recommended next action	

Scope and limitations

Document exactly what was reviewed, the environments and access provided, the date, excluded areas, and the difference between this readiness review and a penetration test, compliance assessment, or guarantee.

Architecture reviewed

Front end, back end, database, authentication, storage, hosting, external services, AI models/agents, and data classes.

Findings register

ID	Area	Severity	Finding	Evidence	Required action
F-001					

Launch blockers

-

24-hour correction plan

-

Seven-day correction plan

-

Residual risk and acceptance

Risk	Likelihood	Impact	Control	Owner	Accepted

Evidence appendix

Attach or reference test output, authorization matrices, security preflight results, diff review, deployment evidence, and rollback validation.

This report is a point-in-time readiness assessment, not a warranty, certification, legal opinion, or penetration test.

Assessment method

Record Pass only when evidence supports the requirement. Unknown is treated as risk. A numeric score never overrides a failed or unknown Critical control.

Rating	Meaning
Critical	A failure may expose data, bypass authority, create false success, cause irreversible damage, or prevent recovery.
High	A material launch or operational risk requiring correction or explicit acceptance.
Medium	A meaningful weakness that should be scheduled and owned.
Low	An improvement with limited immediate launch impact.

Reviewer attestation

Field	Entry
Reviewer name / organization	
Review date	
Scope/version/commit	
Evidence repository/location	
Signature or approval record	

Client acknowledgment

The client acknowledges the stated scope, exclusions, residual risks, and responsibilities. Acceptance confirms receipt of the report and does not convert the review into a warranty, certification, legal opinion, or penetration test.
